Everwood Natura  
(Commercial Project)

Everwood cladding boards lend a distinct impression on façades. Highly resistant to fading or dis-colouration, buildings will look new for years, without the hassles of periodic maintenance. Interlocking assembly ensures no water leaks to the building superstructure and hollow core technology for insulation, are benefits unavailable in other façade solutions. Everwood cladding blends perfectly with other materials in contemporary or futuristic design, unboxing a whole new world of possibilities.
