Everwood Flexon
(Residential Villa Project)

Everwood railing & louver profiles are extraordinarily defiant to deterioration from effects of rigorous weathering. Our profiles and colours open up dimensions for design in many applications, replacing other materials that need regular maintenance. With high UV tolerance, these profiles are crack & splinter proof, requiring no regular painting or surface sealers to retain original aesthetics. Being anti-corrosive they are ideal for seaside applications.

Flexon

Creative Flexibility, Yours Durably.

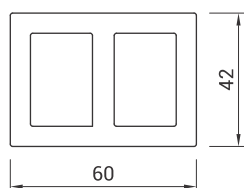

Everwood Flexon is most suitable for outdoor railings, staircases, louvers, duct coverings, fencing, and other alternative applications. Everwood Flexon high strength and easy to install profiles enhance architectural design options that are versatile and unique.
